SUMMARY

As a Web Developer, I design and develop dynamic, high-performance web applications using the MERN tech stack and Next.js. I specialize in building scalable, efficient, and user-friendly solutions, ensuring clean, maintainable code through rigorous code reviews and continuous optimization.

SKILLS

PROFESSIONAL

- React.js
- Express.js
- MongoDB
- Tailwind CSS
- JavaScript
- Next.js
- Node.js
- SQL
- Git
- Prisma

EDUCATION

ST JOSEPH'S INSTITUTE OF TECHNOLOGY

CGPA -- 8.33

2022 -- Present

RIVERDALE HIGH SCHOOL

HSE -- 79%

2020 -- 2022

ORCHID TECHNO SCHOOL

SSLC -- 71%

2019 -- 2020

PROJECT EXPERIENCE

E-COMMERCE WEBSITE(For Retailers)

Role: Web Developer

Technologies: MongoDB, Express.js, React.js, Node.js, AWS

Achievements: Recreated the front end of an Amazon-like e-commerce website, implementing Authorization and Authentication, along with Products lists and Aids user to perform CRUD Operation

CODE - SYNC

Role: Web Developer

Technologies: MongoDB, Express.js, React.js, Node.js, WebSockets

Achievements: A Collaborative coding platform enabling real-time code editing through shared room IDs, featuring seamless frontend-backend integration, a user-friendly interface, and a scalable, responsive design

SOCIAL - MEDIA

Role: Web Developer

Technologies: Next.js, PostgreSQL, Prisma, Clerk Auth, NeonDB

Achievements: Developed a scalable and secure social media platform using Next.js, PostgreSQL, and Prisma, integrating Clerk Authentication for seamless user management and Neon DB for efficient data storage.

ACHIEVEMENTS

DATA-THON : Won - II price for developing supply chain using prediction and allocation for farmer network

CTF : Got in top 50 participates among asia in CTF competition

INTERNSHIP

ALTRUISTY : Role played a Back-end engineer in building Employee management system for different role of authorization of the organization
